

Towards a better understanding of the ongoing decline in the birth rate in Switzerland: Updating trends and exploring the potential of dataset triangulation

Prof. Dr. Kaspar Staub ^a, PD Dr. Tilo Burkhard ^b, Prof. Dr. Katja Rost ^c

1. Background

In recent years, declining birth rates have been the focus of attention in many parts of the world.^{1,2} Although some countries experienced a short-term increase in births during the Covid-19 pandemic in 2021, many European countries have experienced a marked decline in birth rates, continuing a negative trend that may have begun before the Covid-19 pandemic.³ The reasons for this are still subject to speculation, but it is thought that changing attitudes to life, life planning decisions, perceptions and uncertainty among young people play an important role.^{4,5} In Switzerland, the decline in the birth rate has been evident since around 2018. In 2023, 80,024 live births were registered in Switzerland, compared with 82,371 in 2022 and 89,644 in 2021. Preliminary monthly data from the Federal Statistical Office (FSO) for 2024 suggest that the negative trend will continue in 2024, as in other European countries.

In a recently accepted article in *Population Studies*,^{6,7} Kaspar Staub's research group analysed a large dataset of official Swiss population-level vital statistics, known as BevNat, from FSO. We obtained fully anonymised monthly individual data on all births in Switzerland between January 1987 and December 2022 (>2.9 million births). We show (Figure 1) that the general fertility rate (births per woman aged 15-49) in Switzerland is approaching an all-time low. There was a brief baby boom in 2021, the second year of the pandemic in Switzerland, but since 2022 the negative trend that started around 2018, before the pandemic, has continued. A cursory analysis at the level of the available subgroups shows that the decline since 2022 has been more pronounced in German-speaking Switzerland, among non-Swiss mothers and among younger mothers under 30 years of age.

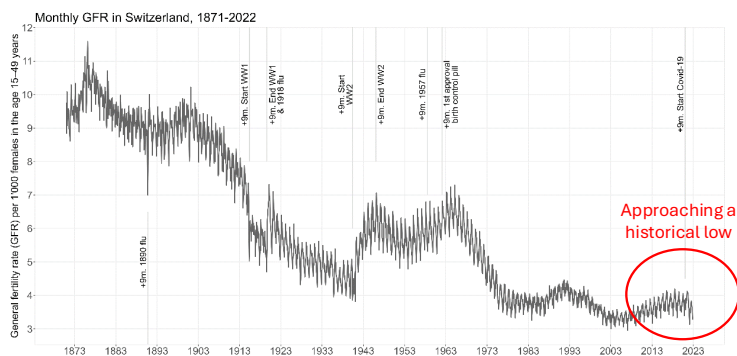

Figure 1: Long-term trend in monthly general fertility rate (GFR), Switzerland, 1871–2022 (from Le Vu et al. 2025)

2. Research gap and relevance

Research and knowledge gap: The above-mentioned study based on BevNat data is the only one to date that focuses on recent birth trends in Switzerland from a demographic point of view. However, the study was conducted at the population level, with limited depth of variables and only superficial subgroup analysis. As elsewhere in Europe, recent trends are therefore only partially understood, and it is not clear which population subgroups are particularly affected by the decline in births and why. To gain a better understanding, the BevNat data need to be updated and analysed in more depth, and other Swiss data sets on births, for example from maternity hospitals, and attitudes from socio-economic studies need to be added for triangulation.

Societal relevance: It is expected that the issue of the declining birth rate will continue to receive increasing attention in general and in Switzerland, incl. from the authorities and the public (media). In addition, clinicians are also confronted with the issue because the decline is already noticeable in practice. This is also the case at the obstetrics department of the University Hospital Zurich, the largest maternity hospital in the canton: While in 2018 and 2019 the USZ obstetrics clinic recorded >2,900 births per year, in 2020 and 2021 just >2,700 and in 2022 and 2023 just >2,400. However, the long-term trend shows that the birth rate has fluctuated over the past few decades, so it is also possible that the trend will reverse in the next 5-10 years, which we can only confirm by continuous monitoring.

Relevance for the UZH: The URPP 'Human Reproduction Reloaded' is currently underway (Katja Rost is co-director), and declining birthrates and possible explanations from a sociological and economic perspective will be one focus for the next three years. However, the URPP does not focus on demographic trends and the population level, so the collaboration between clinics, sociological aspects and demographic population research makes sense and strategically positions the PRC and the UZH to become an academic competence hub for this topic in the coming year.

3. Project plan

3.1 Objectives and research question

The proposed PRC Seed Grant project is designed to start at an early stage to address the above research gaps in an innovative way. It has the following **three main objectives**:

^a Institute of Evolutionary Medicine, University of Zurich

^b Department of Obstetrics, University Hospital Zurich

^c Institute of Sociology and URPP "Human Reproduction Reloaded", University of Zurich

- 1) To update the analysis of the BevNat data up to 2024, expand the subgroup analysis, and establish the basis for continuous monitoring in the years to come.
- 2) To explore the possibilities of triangulating the BevNat data with further data sets around births and attitudes which provide further variables for a better understanding of on-going trends.
- 3) Write-up a scientific publication and develop the framework for a larger funding application that brings together various disciplines in the context of the PRC.

Research question: Using the BevNat population data and other data sets, can we gain a better understanding of who is particularly affected by the falling birth rate in Switzerland?

3.2 Working steps, data & methods

Step 1: Update the analysis of the BevNat data and expand the subgroup analysis

In this step we will update and deepen our analysis of the BevNat data at the population level. This is a straightforward step that can be completed in the short time available, as we are very familiar with these data from previous publications^{6,8,9} and the R codes are already available. We will obtain a new dataset from FSO containing all births between 1989 and 2024. These individual data include information on maternal age, nationality, municipality of residence, parity, sex and vital status of the newborn, and multiple births. As in our previous study, we again calculate the general fertility rate using the population of women aged 15-49 as the denominator^{6,10}. The expected monthly number of births based on previous years is estimated using a Bayesian hierarchical model; a Poisson model is used to model the number of births, while the population is considered as an offset. Particular attention will be paid to the further development of subgroup analysis. This will now be done in a multivariable way to adjust for the various co-factors. The proven Swiss neighbourhood index of socioeconomic position (Swiss SEP index) will again be linked to the data set via the municipality to control for the socio-economic background in the absence of individual information.¹¹ The FSO municipality typology (urban/rural, etc.) is also linked to the dataset. Based on previous publications,¹² spatial components are to be integrated into the models to identify and map hot or cold spots of birth decline.

Step 2: Exploring the potential of data triangulation with other data sets in Switzerland

If a single data set is not sufficiently compelling on its own, or if the range of variables is too narrow, then it is worth triangulating with other data sets that provide further arguments. This also reduces bias and increases the credibility, explanatory power and validity of the results. Both Kaspar Staub's and Katja Rost's research groups have experience of such approaches, for example in the topics of dietary patterns¹³, excess weight¹⁴, innovation, or marriage and social mobility topics.¹⁵⁻¹⁷ First, we will perform a triangulation between BevNAT and two different hospital birth data sets. a) Data from the USZ Obstetrics Clinic, contributed by Tilo Burkhardt. This database goes back several decades and includes every birth at the USZ, with a higher coverage of variables than BevNat (e.g. parents' occupation, more precise place of residence, etc.). A challenge will be the ethical aspect of providing only fully anonymised data to the study team at the IEM. b) We will obtain the medical statistics of all Swiss hospitals from FSO, which also includes all hospital births. The coverage of variables is similar to BevNat, so this dataset is primarily used to validate the results of BevNat and USZ. Secondly, several socio-economic data sets from Switzerland, e.g. the Swiss Household Panel (SHP), macro-economic indicators of FSO or regional results of referendums on family issues, are added, which can be linked to the birth data at the level of municipalities, districts, or MS regions. This allows us to explore the causes of the decline in the birth rate in more detail, both longitudinally and at the regional level. Switzerland is a suitable "laboratory" for such studies due to its high cultural diversity. One of the tasks of the postdoctoral researcher funded by the grant will be to identify an appropriate method for triangulation. Furthermore, we will conduct a systematic search and overview of what other data sets on births (and beyond) exist at which levels (national, regional, local) in Switzerland that could be used for further triangulation, and what the challenges are. We will create a data map for this purpose. This is particularly important for the funding application in step 3.

Step 3: Write-up a scientific publication and develop the framework for a funding application

This step should lay the foundation for further work after the end of the Seed Grant. Steps 1 and 2 should lead to a joint publication on the latest trends. Also, the framework for a larger interdisciplinary funding application to the SNSF or similar should be developed.

3.3 Team, interdisciplinarity, schedule, and expected outcomes

The project brings together applicants from demography/public health, obstetrics and sociology, who will contribute their expertise and experience with different data sets. Part of the funding will be used to hire a 6-month, 25% post-doctoral assistant in Kaspar Staub's group. This person will have a demographic-epidemiological background and very good methodological and R skills to carry out the main work steps. The project is set to last 6 months. Before starting, the BevNat data up to 2024 will be obtained from the FSO. The first four months of the project are planned for analysing the BevNat data (Step 1) and for triangulation (Step 2). The last two months will be used to write-up a publication and to draft the framework for a larger funding application (Step 3). At the end of the project, the first draft of a joint paper on the latest trends should be available, along with the framework for a larger funding application.

Budget Proposal

The grant funds will be utilized as follows:

- 6 months postdoc assistant salary (18/3) in Kaspar Staub's group, 25% position, total CHF 14,550.-
- Obtaining BevNat and Hospital Statistics data until 2024 from FSO: CHF 1,400.-
- Data management USZ for PD Dr. Tilo Burkhard: CHF 4,000.-

Total: CHF 19,920.-

Zurich, 31 January 2025

Confirmation of collaboration

To whom it may concern

We hereby confirm that we will work closely together on the PRC Seed Grant project submitted.

Kind regards

UZH Journal 3/2019

• EDUCATION

- 2024 **Adjunct Professor (Titularprofessor)**, Faculty of Medicine, University of Zurich (CH)
- 2015 – 2021 **MSc Epidemiology** DL, London School of Hygiene and Tropical Medicine (GB)
- 2018 **Habilitation (venia legendi)** in Evolutionary Medicine, University of Zurich (CH)
- 2013 – 2014 CAS Research Management, University of Bern (CH)
- 2010 (15.10.) **PhD (Dr. phil.) in Economic, Social & Environmental History**, University of Bern (CH), Supervisor Prof. C. Pfister (Thesis: “*Biological standard of living in Switzerland since 1800*”)

• CURRENT POSITIONS

- Since 2014 **Head of Research Group, Anthropometry and Historical Epidemiology Group**, Institute of Evolutionary Medicine, University of Zurich (CH): 4 Senior Researchers, 1 PhD Student, 3 Junior Research Assistants, 7 Dr. med. students, 8 MMed students.
- Since 2014 **Institute Manager & Head of the Administration Group**, Institute of Evolutionary Medicine, University of Zurich (CH)
- Since 2021 Research Associate & Lecturer, **Institute of History**, University of Bern (CH)

• PREVIOUS POSITIONS

- 2012 – 2017 Lecturer in Quantitative Methods, **Institute of History**, University of Bern (CH)
- 2011 – 2014 Lecturer in **Quantitative Economic History**, Dep. of Economics, UZH
- 2010 – 2014 Postdoctoral Research Assistant (100%), Centre for Evolutionary Medicine, UZH
- 2005 – 2010 Postgraduate Assistant (60%), Institute of History, University of Bern (CH)

• INSTITUTIONAL RESPONSIBILITIES & ELECTED MEMBERSHIPS

- Since 2023 MC Member and Working Group Leader in the **EU Cost Action CA22116 “The Great Leap**. Multidisciplinary approaches to health inequalities, 1800-2022” <https://t.ly/HQE6y>
- Since 2023 Member Steering Committee **IUSSP Panel ‘Epidemics and Contagious Diseases: The Legacy of the Past’** <https://t.ly/fBIE>
- 2022-2024 Affiliate, **Rachel Carson Center for Environment and Society**, LMU Munich (GER)
- Since 2021 Elected member, **Epidemiology & Biostatistics PhD Program**, University of Zurich (CH)
- Since 2021 Elected member, «**Initiative Geisteswissenschaften**», University of Zurich (CH)
- Since 2021 Elected member, **Crisis Competence Center**, University of Zurich (CH)
- Since 2020 Elected Faculty Member, **Swiss School of Public Health**, SSPH+
- Since 2019 Member Scientific Board, **Center for Military & Disaster Medicine**, Swiss Armed Forces
- Since 2019 Elected member, **Digital Society Initiative (DSI)**, **Community Health**, UZH

• SUPERVISION OF GRADUATE STUDENTS AND POSTDOCTORAL FELLOWS

- Since 2013 Supervision of a total of >50 MA, MSc, MMed, BA, BSc thesis projects at various faculties and different institutions in CH (Universities Zurich & Bern, ETH Zurich, Master of Public Health).
- From 2021 Supervision of 1 PhD student (ongoing SNSF project)
- Since 2018 Supervision of 7 Dr. med. thesis (5 University of Zurich CH, 2 University of Bern CH)
- Since 2013 Supervision of 7 Postdoc / Senior Research Assistants (names available upon request)

• APPROVED RESEARCH PROJECTS

Since 2011 Successful acquisition of **24 grants** as PI and Co-PI with a total amount of **CHF >3.5 million** from agencies such as the **Swiss National Science Foundation**, EU Horizon Program, the Swiss Federal Office of Public Health, Swiss Armed Forces, and various foundations. Complete list here: <http://orcid.org/0000-0002-3951-1807>.

• PUBLICATION OUTPUT

Since 2010 >80 publications in peer-reviewed journals, 12 book chapters, >45 other relevant publications.

• TEACHING ACTIVITIES

Since 2011 Held a total of >700 lessons in Quantitative Methods, in Health History, and in Evolutionary Medicine at various faculties of the Universities of Zurich & Bern (CH).

• REVIEWING ACTIVITIES

Since 2022 Member Editorial Board of *PLOS ONE* and *PeerJ*.

2021 Committee member: Kristina Thompson, Faculty of Science, Health Economics and Health Technology Assessment, Vrije Universiteit Amsterdam (NL)

2019 - 2021 Committee member 2 Dr. med. thesis, Med. Faculty, Univ. Hospital Bern (PI Prof. Z. Stanga)

Since 2011 Reviews for the Swiss National Science Foundation, Am. Journal of Epidemiology, Europ. Journal of Public Health, Economics and Human Biology, BMJOpen, PLOS ONE, BMC Public Health, Int. Journal of Public Health, Annals of Human Biology, Placenta, etc.

• ORGANISATION OF SCIENTIFIC MEETINGS

2022 Organiser Int. Symposium “*Epidemics, space & inequality – past and present*” (Zurich, CH, together with EPIBEL (<https://www.epibel.be>, program: <https://bit.ly/3MtSj29>).

2020 Co-Organiser Workshop “*Epidemic diseases in history, 14-20th centuries*” (Bern, CH)

2019 Organiser Int. Symposium “*Perspectives on human body height*” (Zurich, CH)

2018 Organiser Int. Symposium “*Obstetrical Dilemma*” (Zurich, CH)

2016 Organiser Int. Symposium “*Obesity: The evolution, the present and the future*” (Zurich, CH)

2015 Co-Organiser of the International Evolutionary Medicine Conference 2015 (Zurich, CH), with Nobel Laureate Harald zur Hausen et al. <https://bit.ly/3iddZ3Y>

• MEMBERSHIPS OF SCIENTIFIC SOCIETIES

- International Society for Evolution, Medicine & Public Health (ISEMPH)
- Worldwide NCD Risk Factor Collaboration NCD-RisC <http://www.ncdrisc.org>
- Swiss Society of the History of Medicine and Sciences
- Schweizerische Gesellschaft für Wirtschafts- und Sozialgeschichte (SGWSG)

• MAJOR INTERNATIONAL COLLABORATIONS

- 2022 (May): Invited Academic Guest at the **Centre for Research on Pandemics & Society (PANSOC)** (PI Prof. Sverre-Erik Mamelund, Oslo Metropolitan University, NOR)
- Since 2019: Active invited member of the **international consortia “Worldwide historical stunting”** (PI Prof. Eric Schneider, Economic History Department, UCL, UK)
- Since 2019: Active invited member the **international consortia “Later-life outcomes of height”** (PI Prof. Jan Kok, Historical Demography and Family History, Radboud University, NL) <https://t.ly/19bO>
- Since 2016: Active invited member of the **international consortia “Hunger Draws the Map: Food Shortages in Europe, 1914-1922”** (PI Sir Prof. Hew Strachan, History, Oxford University UK, <https://bit.ly/3gEUC0q>)

Professional Address	Klinik für Geburtshilfe, Universitätsspital Zurich Frauenklinikstrasse 10, 8091 Zurich
Work Phone	+41 44 255 5192
E-mail	Tilo.burkhardt@usz.ch

2. Current appointment

Since 08/2015: Chief of service, Department of Obstetrics, University Hospital Zurich

3. Degrees and Certifications

2016:	Privatdozent, Venia legend, University Zurich
2014:	Specialty: fetomaternal medicine.
2012:	Good Clinical Practice Module 3
2009:	Exam of Gynecology and Obstetrics (FMH).
2003:	Doctoral Thesis on doppler ultrasound in monochorionic and dichorionic twins.
2002:	Medical degree , Humboldt-Universität Berlin, Germany.
1994:	German High School degree , Max-Planck Gymnasium Riesa, Germany.

4. Professional activity/ post-graduate training

08/2015:	Chief of service (Leitender Arzt) , Department of Obstetrics, University Hospital Zurich.
07/2009 – 07/2015:	Attending physician (Oberarzt) , Department of Obstetrics, University Hospital Zurich.
04/2008 – 04/2009:	Clinical fellow , Department of Obstetrics and Gynecology Vivantes Humboldt Hospital Berlin.
11/2007 – 03/2008:	Clinical fellow , Department of Obstetrics and Gynecology University Hospital Zurich.
04/2007 – 10/2007:	Clinical fellow , Department of Neonatology, University Hospital Zurich.
01/2004 – 04/2007:	Clinical fellow , Department of Obstetrics and Gynecology University Hospital Zurich.
09/2002 – 12/2003:	Research fellow , Perinatal Physiology Research Unit, Department of Obstetrics, University Hospital Zurich.

5. Teaching/Mentoring experience

2018 – 2020:	Master thesis supervisor for Anahita Bajka.
2017 – 2019:	Thesis supervisor for Jelena Schindler.
2016 – 2017:	Thesis supervisor for Gabriela Amstad Bencajova.
2014 – 2017:	Thesis supervisor for Helmut Plett.
2013 – 2015:	Master thesis supervisor for Jovana Jucker.
2013 – 2014:	Master thesis supervisor for Rebecca Hartmann.

Education and Academic Qualification

Since 2012	University Zürich (Social Science Faculty) Full Professor for sociology, in particular economic/organizational sociology
Since 2011	University Zürich (Business Faculty) Adj. Professor for business administration
2011	Helmut- Schmidt-University Hamburg (Social Science Faculty) Offer of professorship for business administration, in particular organizational theories and social science methods (W3)
2011/2012	Friedrich-Schiller-University Jena (Business Faculty) Full Professor for business administration, in particular strategic and international management (W3)
2010/ 2011	University Mannheim (Social Science Faculty) Assistant Professor (Juniorprofessor) for organizational sociology (W1)
2006	TU Berlin (Business Faculty) PhD „The social structure of innovations in organizations“, Dr. rer. oec., summa cum laude
1994/2000	University Leipzig (Social Science Faculty) Study of sociology and cultural studies, Dipl.-Soz.

Management Qualification

2001	Innovations & Venture Partners GmbH, München (today: Concentro Management GmbH) Consultant business development
2000/2001	Bridges Public Management Consulting, Berlin Consultant public affairs and public management
1998/1999	Betrieb für Beteiligungsverwaltung, Leipzig Assistent ownership controlling
1997/1998	Böttcher Culture & Communication, Leipzig Assistent cultural management

Editorial and Board Membership

2022/-	Mitglied des Beirats der Inhaltskommission Forum, Pfarrblatt der katholischen Kirche Kanton Zürich
2020/-	Selection committee, WHU Best Paper Award
2020/-	Editor of “Leadership Quarterly”
2019/-	Vice-president of the University Council of the University Luzern
2018/-	Board chair of Schumpeter Center for Research on Socio-Economic Change
2018/-	Editor of “Management Revue”
2016/-	Board member of the University Council of the University Luzern
2015/-	Board Member of “Junior Management Science”
2015/2017	Associate Editor of “Journal of Management History”
2014/-	Co-Editor of „Jahrbuch Ökonomie und Gesellschaft”
2014/-	Board member of „Review of Managerial Science”
2012/2014	Board member of the European Public Choice Society (EPCS)
2009/-	Board member of „Risk governance and control: financial markets and institutions”

Executive Functions

2018/-	Vice-Director Förderbeirat Stiftung für wissenschaftliche Forschung
2023/-	Co-Director of the UFSP Human Reproduction, UZH
2020/2022	Vice-Director of the UFSP Human Reproduction, UZH
2016/-	Vice director of the Sociological Institute (SUZ), UZH
2015/-	Executive Member of the „Center for Information Technology, Society and Law (ITSL)“, UZH
2014/-	Vice president of the “Center for higher education and Science Studies (CHESS)”, UZH
2019/23	President of the Gender Equality Commission, UZH

Awards

2024	Among the Top100 Women in Business in Switzerland in the Catagory Science, Schweizer Wirtschaftsmagazin für die Frau
2024	Winner of the Euram Award
2023	Among the Top100 Women in Business in Switzerland in the Catagory Science, Schweizer Wirtschaftsmagazin für die Frau
2022	Nomination for Leadership Quarterly Best Paper Award 2021
2022	Nomination for the UZH-Mentoring Award, Graduate Campus UZH
2022	Among the Top50 most important intellectuals in Switzerland, Kulturredaktion CH Media
2022	Among the Top100 Women in Business in Switzerland in the Catagory Science, Schweizer Wirtschaftsmagazin für die Frau

2021	Among the Top100 Women in Business in Switzerland in the Category Science, Schweizer Wirtschaftsmagazin für die Frau
2020	Among the Top100 Women in Business in Switzerland in the Category Science, Schweizer Wirtschaftsmagazin für die Frau
2016	Winner of the Emerald Literati Network Awards for Excellence, Best Paper Award 2016, Corporate Governance.
2015	Winner of the John F Mee Award 2015 for Outstanding Contribution to Management History, Academy of Management 2015, Vancouver, British Columbia, Canada.
2014	Winner of the CGIR Best Paper Award 2013, Corporate Governance. An international Review
2014	Winner of the Theo Schöller-Award – Munich Best Paper Award Innovation Management, Theo und Friedl Schöller Foundation (5000 Euro), LMU Entrepreneurship Center, TU München 2013, München
2012	Journal of Management History Award for Best International Paper, Academy of Management 2012, Boston
2011	Runner-up CGIR Best Paper Award 2011, Corporate Governance. An international Review
2010	Nomination Best Paper Award, EIASM Annual Meeting, 17th International Product Development Management Conference
2009	Research Fellow, CREMA (Center for Research in Economics, Management and the Arts)
2009	Nomination Best Paper Award, EURAM Annual Meeting, Corporate Governance Track
2005-2010	Swiss National Foundation (SNF) Fellowship
2004-2005	Fellowship of the Foundation Ecocentia
